# Test facility planning and general contractor

## Test facility planning and realisation

From your idea to the test facility turnkey solution. We support you in each stage.

- 1 **Consultancy and studies** for a profound basis for initial decisions
- 2 **Planning** of innovative test facilities and test centres considering the optimum technical and most economical solution
- 3 **Tender management** for a realization without surprises
- 4 **Realisation** with on-time, on-quality and on-budget project support

### ✓ General contractor

One direct contact. No worries!

- Complete planning from the initial phase to conclusion of planning activities
- Implementation support from planning completion to successful approval
- One point of contact for all project issues

### ✓ Technical project management

Flying blind? No, thank you!

- Full monitoring of schedule, quality and costs
- Professional coordination for engineering construction projects
- Project structure, project monitoring and project management
- Process definition
- Control of clients-internal workflows

# 1

Consultancy and studies

Technology consulting • Requirements management • Expert reports • Feasibility studies • Concept studies • Technical studies • Market research • Cost estimates • Scheduling • Identification of including standards • Concept development • Project manual

# 2

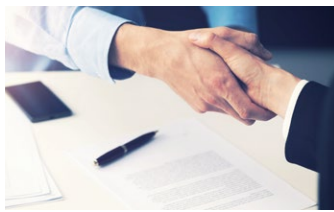

Test facility planning

Concept development • Fine-tuning of the technical approach • Infrastructure and construction requirements • Tender documentation and service specifications • Implementation planning

# 3

Tender management

Professional management of tender and support procedures • Evaluating tenders • Supplier recommendations • Order evaluations

# 4

Realisation

Technical implementation and construction supervision • Realisation as general contractor • Technical inspections • Technical approvals • Risk assessments • Hazard analyses • CE certification • Change request management • Commissioning • Declarations of conformity • Briefings/trainings

✓ **Application of the current ISO and DIN standards**

We identify the applicable standards and take them into account throughout the entire development process.

DIN EN ISO/IEC 17025 • EN 9100 • ISO 14001 • ISO 9001

**AUTOMOTIVE**

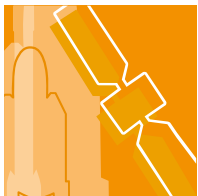

**INFOCOM**

**MOBILITY, ENERGY & ENVIRONMENT**

**AERONAUTICS**

**SPACE**

**DEFENCE & SECURITY**

# IABG. The Future.

IABG offers integrated, ground-breaking solutions in the sectors Automotive • InfoCom • Mobility, Energy & Environment • Aeronautics • Space • Defence & Security. We provide independent and competent consulting. We implement with future viability and target orientation. We operate reliably and sustainably. Our success is based on an understanding of market trends and requirements, on our staff's technological excellence and a fair relationship with our customers and business partners.
